

## TEST AND RENTAL CENTRIFUGE PM-230 EFFICIENT PRODUCT TRIALS

Our test and rental centrifuges help you to realize fast and meaningful product tests. Use the PM-230 to refine processes and optimise systems to reduce costs. Gain insights into new applications and carry out feasibility studies to make informed decisions.

We provide a ready-to-use compact centrifuge system, complete with control system and operation panel, easily transported and quickly deployable at your site.

### EASY SETUP

- + Plug & play design
- + Smallest footprint
- + Simple interface

### EFFICIENT SUPPORT

- + Machine readily available
- + Engineering services
- + Process experts

### SIMPLE TO USE

- + Integrated thickening cone
- + User friendly control panel\*
- + Peripherals available on demand

### GUARANTEED SUCCESS

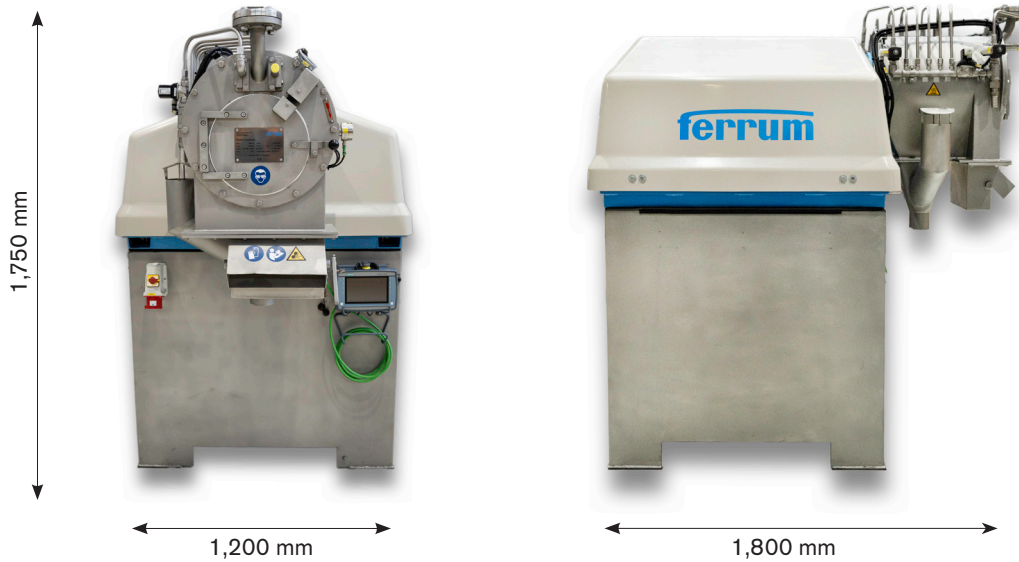

- + Results easily scalable
- + Efficient washing system
- + Different sieves easily exchangeable

\*Control panel

## TECHNICAL DATA

Pusher centrifuge	PM-230	Unit
Basket diameter	230	[mm]
Number of stages	2	[-]
Max. speed	3'200	[min <sup>-1</sup> ]
Max. G force	1'316	[g]
Max. no. of strokes	100	[min <sup>-1</sup> ]
Max. installed electrical power at 400 V / 50 Hz	4	[kW]
Weight centrifuge system	1'100	[kg]
Maximum NaCl throughput (dependent on feed conditions)	1.5	[t/h]

## TECHNICAL FEATURES

- + Integrated thickener, integrated cleaning and washing systems
- + Product and ambient conditions on request
- + Choice of different sieve sizes
- + Variable rotation speed and stroke rate

### INTERESTED?

We will be happy to provide you with further information and support you with your application.
