

TESTIMONIAL

PUSHER CENTRIFUGES

Voskresensk Mineral Fertilizers, JSC

1, Zavodskaya street
RU-140200 Voskresensk
Moscow Region

« Two Ferrum **Pusher centrifuges type P-50/2** delivered according to the contracts respectively in 2013 and 2016 for the production of MPA (water-soluble crystalline monoammonium phosphate) are in operation in our company.

The above-mentioned centrifuges were **delivered on schedule in full compliance with the contractual specification**. The centrifuges have been commissioned, are in fully automatic operation and fully meet the performance parameters stated in the contract.

The Ferrum centrifuges have **proven to be highly reliable equipment** over the entire period of operation. »
